

Media Guidelines for Communicating About Crystal Methamphetamine

This resource is by Mindframe and Cracks in the Ice.

These evidence-informed guidelines are designed to assist the media in reporting safely and responsibly on crystal methamphetamine ('ice').

Summary: These evidence-informed guidelines are designed to inform, support and empower media to report safely and responsibly on crystal methamphetamine ('ice') in ways which minimise harm, stigma and discrimination while maximising help-seeking behaviour.

The guidelines include detailed information on:

- Communicating about someone who uses crystal methamphetamine
- Helpful ways to communicate about crystal methamphetamine
- Harmful ways to communicate about crystal methamphetamine
- Language advice
- Help-seeking information and services

The guidelines are supported by two brief resources:

- **Myths card:** convenient information on some common myths about crystal methamphetamine
- **Language guide:** what terms to use when referring to someone who uses crystal methamphetamine

Developers: This resource was developed through a partnership of *Mindframe* for Alcohol and Other Drugs and *Cracks in the Ice*, and reviewed by content experts, people with lived experience and media professionals.
