

Training for managing co-occurring AOD and mental health conditions

THE UNIVERSITY OF
SYDNEY

—
Matilda Centre

This resource is by the Matilda Centre.

This training guide provides alcohol and other drug (AOD) workers information on assisting comorbid AOD and mental health conditions.

Summary: The Comorbidity Guidelines Online Training Program aims to provide alcohol and other drug (AOD) workers with **evidence-based information to assist with the management of comorbid AOD and mental health conditions.**

Specifically, the program has been developed to assist AOD workers:

- Increase their knowledge and awareness of mental health conditions
- Improve their confidence working with clients with comorbid mental health conditions
- Improve their ability to identify mental health conditions
- Improve their ability to recognise and respond to physical health comorbidities
- Provide practical information on the delivery of a coordinated care approach to clients with comorbid mental health conditions
- Provide practical information on the management and treatment of comorbid mental health conditions
- Improve their ability to manage their own self-care.

The training program consists of 11 training modules that can be completed in any order. At the end of each module, participants will be provided with a short quiz. Once all modules and quizzes have been successfully completed, a completion certificate will be available for download.

This program has been designed to accompany the "*Guidelines on the management of co-occurring alcohol and other drug and mental health conditions in alcohol and other drug treatment settings (2nd edition)*" and facilitate its uptake into clinical practice.
