

Understanding and responding to methamphetamine use

This resource is by Insight.

This resource is an interactive online program for health workers responding to methamphetamine use.

Summary: A self-paced, interactive e-learning program for health professionals and community workers responding to **methamphetamine** use.

The program covers basic information about methamphetamine, including:

- Types of methamphetamine
- Brief history of methamphetamine
- Trends in methamphetamine use in Australia
- Effects of methamphetamine
- Treatments for methamphetamine

The program also introduces tools for health professionals including a [brief intervention tool](#) and a [psychostimulant early intervention flowchart](#).

Upon completion of the program, participants are asked to complete a brief quiz to test their knowledge and will receive a printable certificate as evidence of learning.

Note: the full-day training package introduced in this program is available in Queensland only. If you require training in another State or Territory, you can access a [free online training program for frontline workers](#).

Developers: This resource was developed by [Insight](#) as part of [Queensland Health's](#) response to [crystal methamphetamine \('ice'\)](#).

Costs: Free

Year: 2016
